INSTRUMENTS AND EXPERIMENTAL TECHNIQUES
Volume 27, Numbers 1-6, 1984

(A translation of Pribory i Tekhnika Eksperimenta)

Volume 27, Number 1, Part 1 January-February, 1984

	Engl./Russ.	
Coordinate-Sensitive Detectors Based on Multichannel Plates (Review) — M. A. Gruntman	1	14
NUCLEAR EXPERIMENTAL TECHNIQUES		
High-Frequency Section of the "Troll" Electron Synchrotron with Cyclotron Preacceleration — V. S. Panasyuk, Yu. M. Tereshkin, and V. B. Khromchenko	20	30
Determining the Variance of the Electron-Beam Divergence in a Cyclic Accelerator by Measuring the Synchrotron Radiation — I. S. Guk and P. I. Gladkikh	25	34
Detector for Measuring the Current Density of a High-Current Microsecond Beam — A. G. Nikonov, Yu. M. Savel'ev, and V. I. Engelko	29	37
Independent Device for Measuring Neutron Fluxes from Pulsed Sources — V. A. Kuz'min, N. A. Loskutov, and A. N. Popytaev	32	39
Automated Neutron Diffractometer — V. I. Kadashevich, Ya. A. Kasman, L. P. Kolesnikova, V. P. Plakhtii, V. A. Priemyshev, S. M. Ruzin, V. N. Slyusar', O. P. Smirnov, K. I. Turapina, and Yu. P. Chernenkov	34	41
Increasing the Brightness of a Proton Beam from an Arc Source — V. I. Vatkin, V. N. Getmanov, and O. Ya. Savchenko	37	44
Improvement of the Parameters of Ge(Li) Spectrometers by Discrimination during the Pulse Rise Time — A. A. Bogdzel', A. Duka-Zoiomi, Ya. Kliman, and V. Presperin	44	49
Graphic Method of Determining the Phonon Characteristics from Single-Phonon Coherent Scattering of Neutrons — V. I. Bobrovskii, I. L. Zhdakhin, and B. N. Goshchitskii	48	52
Analysis of Photographs from Large Bubble Chambers Using the HPD Automatic Opticomechanical System — A. A. Borovikov, V. V. Bryzgalov, M. M. Gubaeva, S. A. Gumenyuk, and G. N. Khromova	51	55
Feeding Large Wide-Gap Spark Chamber with High-Voltage Radio Frequency Pulses — T. L. Asatiani, S. V. Alchudzhyan, L. I. Kozliner, and G. S. Martirosyan	54	58
Proportional Chambers with High-Voltage Electrodes Made of Aluminum Foil — A. V. Vishnevskii, I. A. Golutvin, Yu. L. Zlobin, Yu. T. Kiryushin, and L. V. Svetov	56	60
Measurements of Primary Ionization by Cluster Counting — Yu. A. Budagov, V. Glinka, A. A. Semenov, S. V. Sergeev, B. Sitar, A. A. Feshchenko, and I. Spalek	59	62
Calibration of an Avalanche Hodoscope Detector through Decays of π^0 and η Mesons into Two Gamma Quanta — S. A. Akimenko, A. V. Bannikov, V. I. Belousov, A. M. Blik, V. N. Kolosov, V. M. Kut'in, Z. V. Krumshtein, A. I. Palinov, and A. S. Solov'ev	63	66
Coordinate-Sensitive Detector on the Basis of Microchannel Plates — M. R. Ainbund, L. S. Gorn, M. A. Gruntman, D. S. Zakharov, A. A. Klimashov, V. B. Leonas, I. P. Maslenkov, and B. I. Khazanov	68	70

Wide-Aperture Transition Radiation Detector for Separating Electrons from Hadrons — Yu. M. Antipov, I. V. Kotov, P. P. Kostromin, R. N. Krasnokutskii, S. N. Maiburov, S. A. Medved', Yu. M. Pishchal'nikov, S. A. Polovnikov, and R. S. Shuvalov..... 73 74
Wide-Aperture Gas-Filled Cerenkov Counter with Spectrum-Shifting Capability — O. E. Gorchakov, V. V. Karpukhin, A. V. Kulikov, V. I. Sidorova, and S. V. Trusov..... 77 77
Cerenkov Counter with Radiation Emitter Consisting of an Aqueous Solution of γ-Amino Acid — A. V. Kuptsov, V. P. Kurochkin, L. Luchan, and L. L. Nemenov..... 80 79
Large-Area Ionization Calorimeter with Scintillation Detectors — V. V. Akimov, I. D. Blokhintsev, M. B. Dobriyan, L. F. Kalinkin, V. D. Kozlov, B. T. Karimov, Yu. I. Nagornykh, V. E. Nesterov, A. V. Plyasheshnikov, V. L. Prokin, and V. S. Shmelev..... 83 82
Investigation of the Characteristics of Thin CsI Film Scintillation Detectors in Recording 20-540-keV Protons — Yu. I. Usikov, Yu. T. Bydai, G. I. Primenko, Yu. A. Tsirlin, and I. V. Éstulin..... 88 86

EXPERIMENTAL APPLICATIONS OF COMPUTER TECHNOLOGY
Automatic System for Time-of-Flight Mass Spectrometric Measurements — M. V. Aprelev, A. A. Glebovskii, I. F. Moiseenko, and A. A. Lisachenko..... 92 89
Interface for the IKS-29 Spectrophotometer and KSVU-2 Computer System — A. I. Gren', A. A. Kucher, and N. V. Vityuk..... 97 94
Direct-Access Adapter for the "Élektronika NTs-03D" Microcomputer — A. V. Eliseenko and M. G. Sedunov..... 99 96

ELECTRONICS AND RADIO ENGINEERING
Connecting a Video Display to a Radio-Optical Image Converter — B. I. Vlasov, V. Yu. Kustov, and A. N. Chaikovskii..... 104 100
Apparatus for Measuring Relaxation Time and Dipole Moments of Molecules in Extremely Weak Solutions — A. A. Potapov and S. I. Voitov..... 107 103
High-Speed Pulse Count-Rate Meter with High Dynamic Range — V. N. Rudkovskii, I. Ya. Nikiforov, and S. V. Khristich..... 109 104
Bidirectional Binary Counter with Variable Pulse Weight — V. E. Mel'nik and Yu. A. Bryukhomitskii..... 111 106
Efficient Voltage Converter for a Tank Capacitor Based on a Piezoelectric Transformer — G. I. Iz'yurova, A. A. Sorokin, Yu. L. Spirin, and V. N. Frolov..... 113 108
High-Speed Series-Parallel Analog-Digital Converter — M. I. Demchuk and V. N. Denisenko..... 115 110
High-Speed Digital-Analog Converter — B. N. Lisenkov and and L. B. Dubrovskii..... 118 113
Measuring the Setting Time of a High-Speed Digital-to-Analog Converter — R. L. Poshyunas and V. V. Sagaitis..... 121 115

APPENDIX 127

Volume 27, Number 1, Part 2 January-February, 1984

ELECTRONICS AND RADIO ENGINEERING
A Synchronous Amplifier with Digital Output — A. V. Alekseev and V. K. Khokhlov. 133 120
A Compact Trigger-Pulse Amplifier with a High Output Voltage — Yu. M. Lebedev-Krasin and B. N. Zharikov. 137 124
Low-Noise Preamplifier — G. E. Leont'ev, V. P. Armonavichyus, and G. S. Mikolaitis. 139 126
High-Power Magnetic-Thyristor Generator with a High Pulse-Repetition Frequency — L. M. Anan'ev, P. G. Gordeev, A. A. Kalinov, N. P. Polyakov, P. P. Rumyantsev, V. V. Sinenko, and Yu. P. Yarushkin . . 141 127

Transistor Oscillator with a Dielectric Resonator — S. S. Bondarenko, A. Z. Venger, and A. M. Tvurin. 143 129
Wide-Range Digital Sawtooth Generator — A. G. Nassonov 145 131
Pressurized 40-kV, 300-kA Three-Electrode Discharger — A. I. Zemskov, A. N. Mokeev, and V. V. Prut. 147 133
Thyristor Modulator of Square Megawatt Current Pulses — É. S. Ermolovich and N. M. Lepekhin. 150 136
Pulse-Height Meter with Anomalous-Reading Selection — Yu. P. Grishin, K. P. Kuznetsov, R. L. Chiritso, and N. N. Baskakov 152 138
Digital Filter for a Precision Laser-Wavelength Meter — B. L. Bukovskii, Yu. M. Kaltygin, and V. A. Raikhert 155 140
Low-Frequency Circuit for a Radiometer — A. V. Varel'dzhyan and M. G. Tokhmakhyan 157 142
Microwave Waveguide Switch for a Low-Noise Radiometer — M. N. Gabdrakipova, V. A. Il'in, K. Z. Fatykhov, and V. S. Étkin 161 146
Fast-Recovery Probe for Double Nuclear Quadupole Resonance Spectrometer — V. P. Anferov and V. M. Mikhail'kov. 163 148
Ion Source Protection in the OGRA-4 Plant — N. V. Matveev and V. A. Obysov 164 149

GENERAL EXPERIMENTAL TECHNIQUES
A Duoplasmatron Containing a Wien Filter for Examining the Surfaces of Solids — A. L. Pivovarov, V. T. Chenakin, V. T. Cherepin, and I. A. Zaporozhets 166 151
A Device for Extracting a Focused Electron Beam into a Gas — M. N. Vasil'ev and A. S. Koroteev 169 154
A Pulsed Valve with Preliminary Gas Ionization — A. V. Voronin, S. E. Goncharov, A. D. Danilov, R. Sh. Kil'keev, and V. M. Kuznetsov. . . 171 156
Digital Generation of the Inverse Function and Calculation of the Energy Distribution of Electron Emission — O. M. Sorokin 172 157
Vacuum Measurement by Reflection of Slow Electrons from a Silicon Surface — Yu. I. Asalkhanov and I. T. Pron'kinov. 177 162
Effects of a Magnetic Field on the Characteristics of a VÉU-7 Secondary Electron Multiplier — M. R. Ainbund, V. A. Gussar, I. P. Maslenkov, N. N. Roldugin, and A. Yu. Khol'nov. 180 165
A ROMS-2 Mass-Spectrometer System for Analyzing a Gas-Discharge Plasma — V. P. Sokol'skii and A. A. Perov. 182 167
A Gated Photodetector — V. G. Oshlakov 184 169
Optical Input System of a Photochronograph with Compensation for the Anisochronism of the Electrooptical Converter — G. V. Kolesov, I. M. Korzhenevich, V. B. Lebedev, and B. M. Stepanov 186 170
Use of an Avalanche Photodiode for Reducing the Noise of a Magnetooptical Converter — A. V. Bogolyubov, V. V. Panin, and B. M. Stepanov 188 172
A Method of Producing Matched Optical Filters for Selected Frequencies of a Fourier Spectrum — I. I. Mokhun' and V. I. Protasevich 191 175
Segmented Metal Discharge Tubes for a Nitrogen Ultraviolet Laser with a Longitudinal Discharge — V. G. Il'yushko, V. F. Kravchenko, and V. S. Mikhalevskii 194 178
Calorimeter for Continuous Measurement of Laser Radiation Power to 10 kW — P. G. Afanas'ev, O. S. Bogdanov, V. D. Daragan, A. Yu. Kotov, V. I. Nalivaev, and V. B. Pampura. 197 180
A Pressure Amplifier with a Mobile Piston Seal for Use with Gases at Pressures up to 2 GPa — N. V. Kapustin, I. P. Ivanov, V. V. Avdeev, and M. I. Ioffe. 200 183
Measuring the Parameters of Liquid Media at High Pressures — S. P. Dmitriev and V. V. Sokolov 202 184
Method of Observing Barkhausen Shocks by Means of Sound Radiation — O. A. Bartenev, V. A. Khamitov, and É. S. Gorkunov 205 187
Contactless Measurement of Charge Carrier Mobility in Semiconductors — Yu. E. Gordienko and B. G. Borodin 208 189
Apparatus for the Investigation of the Kinetics of Photostimulated and Thermostimulated Changes in the Surface Potential of Semiconductors — R. F. Bulatova, A. N. Kornilko, V. A. Pavlukhin, and V. I. Shkaleto 211 192

Two-Crystal X-Ray Diffractometer for the Investigation of the Surface Properties of Materials — A. L. Andrushchenko, V. F. Vakorin, V. S. Parkhomenko, I. R. Tagirov, and V. N. Shchemelev 215 195
A Two-Coordinate Position-Sensitive Detector with Video Display of the Information — V. A. Rezvov, I. N. Serikov, V. I. Sklyarenko, L. I. Yudin, and V. E. Yarosh. 219 199
Attachment to an Electron Microscope for the Study of the Influence of Electron Beams on Semiconductors — K. V. Avakyan and Z. N. Adamyan. 222 202
An Orthogonal Phase-Filter Flow Cell for Measuring the Dielectric Constants of Liquids — A. A. Vertii, V. N. Derkach, I. V. Ivanchenko, and V. P. Shestopalov. 224 204

LABORATORY TECHNIQUES
An Automatic Control Unit for a DFS-24 Spectrometer — Yu. S. Ponosov, Yu. P. Sukhorukov and A. M. Ostern 228 207
A High-Temperature–High-Pressure Cell for Raman Spectroscopy — Yu. E. Gorbatyi, G. V. Bondarenko, and I. V. Babashov. 229 208
A Straight-Through Thermocouple Instrument Measuring the Power of Laser Radiation — P. G. Afanas'ev, O. S. Bogdanov, V. D. Daragan, A. Yu. Kotov, V. I. Nalivaev, and V. B. Pampura. 231 210
Regeneration of the Discharge Tubes of LG-56 Helium–Neon Lasers — A. F. Bylinkin and A. T. Vladul.. . . . . 233 211
An Instrument for Checking the Diameters of Light Guides by Comparison with a Standard — Yu. V. Zavitnevich, A. A. Kozlov, and S. D. Mirovitskaya 234 212
A Multipositional Unit Containing Heated Strip Targets — V. F. Rybalko, V. V. Ruzhitskii, and S. M. Khazan 237 215
A Device to Detect Pulse Signals — T. M. Dem'yanchuk. 239 216
Vacuum Behavior of Polyamidoimide Film — V. A. Gusinskaya, E. A. Kolenko, M. M. Koton, T. V. Batrakova, and K. A. Romashkova 241 218
A Hydrogen Leak for High-Power Gas-Discharge Devices — G. V. Grekova, A. B. Kobelev, and G. G. Loktin. 242 219
Rubber Sealing Components in High-Pressure Gas Systems — A. P. Kurshin and B. É. Kanishchev 243 220
A Fast Thermally Stable Linear Pressure Transducer Based on a Rectifying Metal–Silicon Contact — V. A. Presonov, O. P. Kanchukovskii, and A. L. Shenkevich 245 222
A Thermoelectric Thermostat for a Thin-Film Phototropic Switch — A. I. Gryadunov, V. A. Sadykov, and R. A. Petrenko. 247 224
A Programmable Digital Temperature Source — A. P. Kraev and B. A. Apaev. . . 249 225

Volume 27, Number 2, Part 1 March-April, 1984

Electrochemical Etching of Plastic Track Detectors (Review) — A. A. D'yakov. 253 5

NUCLEAR EXPERIMENTAL TECHNIQUES
Measuring the Shunt Resistance of Three-Dimensional Resonators and Delay Systems — A. A. Zavadtsev, B. V. Zverev, N. N. Nechaev, V. V. Ruzin, and N. P. Sobenin. 263 13
A Sensor for Measuring the Current and the Energy of Electron Bunches — A. D. Stepanov 267 16
Controllable Bending Unit for Targets Used on the Inner Beams for Charged-Particle Accelerators — E. I. Rozum 270 18
A System for Shaping and Focusing a High-Current Beam of Deuterium Ions — A. S. Belov. 272 20
A Photodosimeter of Accelerated Protons — V. I. Kostyuchenko, S. P. Lisovets, L. Ya. Kaplun, and E. A. Gruz 275 23
A Spectrometer for Measuring the Spectra of the Characteristic Energy Losses of Fast Electrons in Thin Metal Foils — K. A. Moldasanov and M. V. Zharnikov 278 25
Specific Light Yield of CsI(Tl) Scintillators in the Case of Soft 2.6-17.4-keV X Rays — V. K. Lyapidevskii, V. A. Prorvich, and A. V. Sartori. 282 28

Characteristics of Liquid Scintillator for Recording $\tilde{\nu}_e$ — A. A. Borovoi, S. V. Nikolaev, and A. V. Perfilov. 286 31
Instrument for Recording Heavy Cosmic-Ray Particles with Dielectric Detectors — E. V. Gorchakov, N. L. Grigorov, V. A. Iozenas, R. A. Nymmik, Yu. V. Trigubov, and G. G. Zenchev 290 35
Influence of the Thickness of the Inversion Layer and the ^{10}B Atom Distribution in the Layer upon the Characteristics of Ion-Doped Semiconductor Counters of Neutrons — E. M. Diasamidze, Yu. A. Solov'ev, and A. N. Shmakov 292 36
A Calorimeter for High-Energy Hadrons — V. D. Volovik and I. G. Kozyr' 295 38
A System for the Control and Stabilization of the High-Voltage Supply of Streamer Chambers — L. S. Vertogradov, Ya. V. Grishkevich, T. A. Lomtadze, V. V. Tokmenin, Yu. Fedorovich, and G. A. Shelkov. 298 41

EXPERIMENTAL APPLICATIONS OF COMPUTER TECHNOLOGY
An Automated System for Investigations of the Temperature Dependence of the Electron Spin-Lattice Relaxation Time — V. N. Dudkov and V. I. Muromtsev 302 44
Independent Measuring Station of the Information-Measuring System of the Neutron Spectrometer GNEIS — I. S. Gorokhov, A. B. Laptev, V. V. Marchenkov, Yu. V. Tubol'tsev, E. Yu. Fokin, and O. A. Shcherbakov. 306 48
A Multichannel Data Collection System — G. V. Basalaev and V. I. Glemba 308 50
Graphics Adapter for Raster Digital Display — V. D. Bakhmatskii, V. G. Belyi, S. M. Bol'shinskii, L. G. Oranskii, and A. N. Poltava. 311 53
Operator-Computer Interface in the Observation of Three-Dimensional Television Images — G. V. Mamchev and P. P. Ovsyannikov. 315 58
Digital Recorder of Single Signals — V. Ya. Starodumov. 319 61
Programmable Signal Shaper — A. L. Finarevskii. 325 67
Unitary-to-Binary Converter with Asynchronous Control — N. M. Nikityuk, V. N. Samoilov, and R. Shyussler 328 69
Converter of Seven-Segment Code to Binary-Decimal and Binary — N. P. Leonov and I. V. Semerkov. 333 74
Interfacing the VDT 52106 Video Terminal and DZM-180 Printer with the Élektronika-60 Microcomputer — V. A. Dolgikh, I. V. Stupenkov, and V. G. Shinakov. 335 77
Interfacing the Élektronika-60 Microcomputer with Character Displays — V. V. Sorochinskii and Yu. N. Kholodenko 337 78
Serial Interface for the Iskra-1256 and Iskra-226 Computers — V. Ya. Starodumov. 339 80

ELECTRONICS AND RADIO ENGINEERING
Apparatus for Sampling Multiparticle Events with Production of Neutral Strange Particles — Z. V. Krumshtein, R. Lyaiste, Z. Mikhaii, L. G. Tkachev, T. Ton, N. N. Khovanskii, B. A. Khomenko, and G. A. Shelkov. 341 83
High-Speed Spectrometer Analog–Digital Converter — A. V. Zhukov, V. N. Makhov, and S. N. Rzhendinskaya. 346 87
High-Speed Precision Analog–Digital Converter of Successive Approximations with Variable Conversion Step — K. N. Stroev and O. A. Frolkov 349 90
Economical Analog–Digital Converter with an Optoisolated Data-Transmission Channel — V. F. Borzhkovskii, V. G. Vlasov, N. K. Mukhachev, and N. G. Stervoedov. 350 92
Use of an Instrument Interface in a Digital–Analog Converter Module — A. I. Sergeev, L. I. Kostenko, A. G. Izbitskii, S. A. Kalugin and V. A. Gridasov 353 95
Digital Accumulator of Recurrent Signals — S. P. Prozorov 355 96
Pulse Generator for Powering Semiconductor Light Emitters — Z. I. Zienko, G. T. Pak, and V. Yu. Smerdov. 359 100
Dischargers for a Pulsed-Voltage Generator — V. D. Aksinenko, V. D. Volodin, E. A. Dement'ev, N. I. Kaminskii, A. T. Matyushin, V. T. Matyushin, and E. A. Matyushevskii 360 101

A High-Power Nanosecond Pulse Generator — A. N. Meshkov, V. I. Shishko and S. N. Eremin 362 103
A Poisson Pulse-Train Generator — L. F. Mukhachev, V. I. Popova, and S. V. Tyurin 365 106
Pulse Generator Using a K155LN1 Integrated Circuit — L. V. Teslenko . . 368 108
Nanosecond Voltage Pickup — V. I. Zaitsev, G. M. Oleinik, and I. R. Yampol'skii. 369 109
Matched Broadband Amplifier — F. G. Abramov, Yu. A. Volkov, N. N. Vonsovskii, I. I. Il'yushchenko, O. V. Mashinin, and V. M. Paskhin. 372 111
Broadband Transformerless Power Amplifier — V. N. Kotlyarov and V. V. Polevoi. 373 113
Broadband Power Amplifier with Distributed Gain along Connecting Lines — S. N. Sharangovich 375 114
Narrowband Comb Filter of Synchronized-Storage Type — A. I. Fendrikov and Yu. A. Kotovich. 377 116

Volume 27, Number 2, Part 2 March-April, 1984

ELECTRONICS AND RADIO ENGINEERING

High Selectivity Switching Filters Using Series 298 Integrated Circuits — A. I. Eremenko 381 118
Measuring Amplitude—Frequency Response of Electrometers — N. N. Aruev, E. L. Baidakov, V. A. Zagulin, and A. V. Yakovlev 383 120
Automatic RÉ-1306 Radiometer Control System Based on an "Iskra-1256" Microcomputer — M. I. Trofimov 385 122
Wideband Spin-Echo Spectrometer for Magnetically Ordered Materials — I. V. Starostenko, V. N. Lukashin, M. N. Uspenskii, and V. P. Leonov. 388 124
Spin-Echo Spectrometer for Ferrimagnetics — A. V. Kunevich, G. V. Lavrent'ev, M. A. Latyshev, G. D. Pavlov, and V. V. Filippov 391 127
High-Voltage Amplifier and Pulse Generator for Checking the Parameters of Piezoelectric Transducers — A. V. Averkin, A. Yu. Dovgalevskii, and V. I. Ul'yanov 395 131
High-Voltage Stabilized Source of Charging Voltages — A. G. Nassonov and L. S. Lantsman 398 134

GENERAL EXPERIMENTAL TECHNIQUES

Information Collection and Mapping System for Tomographic Plasma Flow Investigations — O. V. Filonin and V. F. Yavtsev 400 136
Plasma Electron Source — S. S. Denisov, N. A. Uspenskii, and V. P. Fedyakov 403 139
Pulsed Electron Source Based on Non-Self-Maintained High-Voltage Glow Discharge — N. V. Gavrilov, Yu. E. Kreindel', and P. M. Shchanin 407 143
Quasistationary Injector with Plasma Electron Emitter — V. N. Glazunov, V. G. Grechanyi, and A. S. Metel' 411 146
A Sensor of the Coordinates and Current of an Intense Microwave-Modulated Electron Beam — A. A. Mikhailichenko 414 149
A Three-Strip Ion Source with a Demountable Evaporator — V. V. Kalygin, B. A. Romanov, V. A. Bulygin, and V. Ya. Gabeskiriya. 416 151
Automatic Energy Control in Low-Energy Electron Diffraction — L. N. Babanskaya, M. A. Vasil'ev, S. D. Gorodetskii, and A. S. Filippov 418 153
An Apparatus for Examining Adsorption on Solids from Ellipsometry and the Retarding Potential — Yu. I. Asalkhanov, A. P. Kudryash, and D. D. Egorov 420 155
Circuit for the Excitation and Measurement of the Characteristics of Pulsed Electrostatic Probes — V. S. Belkin. 423 158
Optimum Method of Voltage Supply to the Traveling-Wave Deflection System of an Image Connverter — G. V. Kolesov, I. M. Korzhenevich, V. B. Lebedev, B. M. Stepanov, and G. G. Fel'dman 426 161
Nonlinear Region of the Current-Transfer Characteristics of Microchannel Plates in Image Converters — T. A. Arkhipova, V. K. Belosheev, G. Z. Kuptsova, M. T. Pakhomov, and M. I. Smirnova 429 163

An Inlet System Containing a Molecular Beam and Reactor for Mass-Spectral Analysis of Gaseous Products from the Pyrolysis of Condensed Substances — V. A. Zavadskii, B. Ya. Kolesnikov, and G. I. Ksandopulo 432 165
A Chemical-Ionization Attachment for the MKh1310 and MKh1320 Mass Spectrometers — L. I. Dyubina, E. M. Kleshkov, R. N. Smirnova, and A. I. Kholodov 435 168
A Device for Recording Nanosecond Optical Pulses in the Presence of a Quasistationary Background — V. M. Zalkind, V. D. Kotsubanov, and S. I. Fedotov 438 171
A Multicomponent Frequency-Shift Laser Doppler Velocimeter — A. G. Gagarin and A. I. Mityushin 440 173
A Laser Level for Radio Telescope Surface Adjustement — N. A. Esepkina, Yu. K. Zverev, S. A. Ioffe, A. P. Lavrov, P. A. Fridman, and O. V. Chukanov 442 175
Laser Optoacoustic Spectrometer — É. P. Shliteris and V. A. Bugaev 444 176
Effect of the Lamp Supply Mode on the Characteristics of a Dye Laser — M. F. Lagutin, N. P. Mustetsov, and A. A. Zarudnyi 447 178
A Pumping Generator for a Semiconductor Laser — P. V. Mindra, A. I. Naidenko, A. A. Kuznetsov, and G. G. Andrievskii 450 181
Apparatus for Recording Microwave Interferograms and Holograms Using Liquid Crystals — L. M. Klyukin and Yu. A. Lyakhov 452 182
Magnetic Field Sensors Using Field-Effect Transistors — V. V. Alekseev and I. M. Vikulin 455 185
Upgrading the ÉMR-100 Electron-Diffraction Camera for Use with Gases — G. V. Girichev, A. N. Utkin, and Yu. F. Revichev 457 187
A Time-of-Flight Atomic Probe — A. F. Bobkov, I. L. Karpikhin, V. A. Kasatkin, N. E. Lazarev, and A. L. Suvorov 461 190
A Diamond Pressure Chamber Operating up to 28 GPa for X-Ray Use — T. N. Kolobyanina, G. B. Demishev, T. I. Dyuzheva, V. G. Losev, and S. S. Kabalkina 465 194
An X-Ray Diffractometer Applied to Nondestructive Layerwise Examination — O. K. Kolerov, A. N. Logvinov, V. G. Skryabin, and V. D. Yushin 468 197
Collimators for X Rays — V. N. Leikin and T. A. Mingazin 472 200
An Attachment for Investigating the Photoemission of Electrons under X-Ray Laue-Diffraction Conditions — D. A. Bugrov, R. M. Imamov, and É. M. Pashaev 475 203
A Sealed Gas-Filled Electroluminescence Detector of X Rays with a Focusing System — D. A. Goganov, A. A. Schultz, and V. B. Elkind 478 206
Measurement of the Fast Component of X-Ray Luminescence Attenuation of Commercial Screens in Pulsed Excitation with the PIR-100 Apparatus — I. L. Bronevoi, E. A. Gusev, V. L. Ovsyahnikov, and E. I. Pal'chikov 481 208
Portable ^{3}He Refrigerator — V. F. Troitskii and A. B. Fradkov 483 210

LABORATORY TECHNIQUES

An Automated Surface-Potential Meter — N. M. Aleinikov and S. P. Gribkov 487 213
Piezoelectric Aerodynamic Balance for Measuring Small Loads — V. V. Malov, P. M. Ryabov, and V. G. Farafonov 491 216
Pressure Meter for Corrosive Media — V. L. Ermolenko, N. F. Levchuk, and V. A. Nikolaev 493 218
Electrical Lead-ins For a High-Pressure Gas Chamber — A. P. Kurshin, Yu. V. Stolyarov, and B. É. Kanishchev 495 220
Automated Apparatus for Measuring the Mass of Films Deposited in a Glow Discharge — V. A. Saksonskii, A. N. Shchurov, V. K. Potapov, A. A. Druzhinin, and M. V. Gerchikov 497 222
Production of Thin Silicon Crystals for Transmission Electron Microscopy — I. E. Talanin, L. M. Sorokin, and É. G. Sheikhet 502 225

Synchronizing Circuit for the Agat Electron-Optical Camera for Recording Ultrashort Laser Pulses — M. I. Demchuk, S. M. Dmitriev, V. P. Mikhailov, and P. V. Prokoshin 505 227
Adjustment of Point Contact of SQUID Fluxmeter — V. N. Polushkin 507 229
Constant-Temperature Hot-Wire Anemometer — Yu. M. Prokopenkov 508 230

Volume 27, Number 3, Part 1 May-June, 1984

Spectrometers with Large-Volume Detectors (Review) — M. N. Medvedev..... 511 5

NUCLEAR EXPERIMENTAL TECHNIQUES

Ultra-High Frequency Deflector Shaping Short Electron Bunches — Yu. D. Chernousov and I. V. Shebolaev..... 526 18
Instrument for Measuring the Spatial Distribution of Weak Currents of Ionizing Radiation — R. A. Khaidarov, Sh. M. Mirzaev, and O. R. Ochilov..... 529 20
Detector System for Measuring the Intensity of a Proton Beam in the Range of 10^6-$3 \cdot 10^{12}$ particles/sec — A. S. Dyshkant and R. M. Sulyaev..... 533 23
Investigations of the Parameters of a Monitor with a Highly Sensitive Neutron-Activation Detector with the Aid of a Laser-Operated Neutron Tube — N. N. Beglyakov, D. F. Bespalov, I. I. Vergun, A. A. Dylyuk, R. P. Pleshakova, A. E. Shikanov, M. V. Kirillov- Ugryumov, and G. V. Bogatyrev..... 538 27
Liquid-Hydrogen Target with Recondensation of Hydrogen by Helium — Yu. T. Borzunov, L. B. Golovanov, V. L. Mazarskii, A. P. Tsvinev, and V. F. Chumakov..... 542 30
Tracks Produced by an N_2 Laser in a Streamer Chamber — E. M. Gushchin, A. N. Lebedev, and S. V. Somov..... 546 33
Determination of the Three-Dimensional Resolution of Drift Chambers in π-e and K-e Scattering Experiments at a Particle Momentum of 250 GeV/sec — A. S. Vodop'yanov, T. S. Nigmanov, V. D. Ryabtsov, and É. N. Tsyganov..... 550 37
Technique for Changing the Sensitivity of Dielectric Track Detectors — G. E. Belyaev, V. V. Kushin, V. K. Lyapidevskii, and N. B. Khokhlov..... 554 40
Measurement of the Gas-Amplification Coefficient of Proportional Chambers and Selection of an Analytic Formula Describing the Coefficient — N. A. Kalinina and D. M. Khazins..... 557 43
Time Coordinate Detector with a Porous Dielectric Emitter — R. L. Kavalov, S. M. Luk'yanov, Yu. L. Margaryan, Yu. É. Penionzhkevich, S. G. Gasparyan, and G. G. Chubaryan..... 562 46
Methods of Investigation of Multiple Scattering of Charged Particles — B. G. Skorodumov, Z. P. Kiseleva, I. I. Trinkin, and V. N. Kadushkin..... 566 50
Conversion-Electron Spectrometer — J. Guyaš, A. Domoni, T. Kibedi, A. Krasnakhorkai, T. Fenеš, and Z. Schram..... 570 53
Automatic Control of Data Acquisition in Nuclear Reaction Experiments — S. B. Kumshaev, R. G. Ofengenden, P. N. Svetlichnyi, V. N. Urin, and A. M. Yasnogorodskii..... 575 57

EXPERIMENTAL APPLICATIONS OF COMPUTER TECHNOLOGY

Experimental EUROBUS Microprocessor System — Yu. V. Ermolin, A. A. Matyushin, and V. G. Rybakov..... 581 62
CAMAC Memory Buffer — Vyong Dao Vi, N. I. Zhuravlev, and A. N. Sinaev..... 586 66
Device for Inputting Periodic Analog Signals to an Élektronika DZ-28 Microcomputer — G. N. Deshchenko, V. S. Dragun, and I. S. Pankov..... 589 69
Interfacing a V9-5 Sampling Voltage Converter to an Élektronika DZ-28 Microcomputer — É. P. Snegirev..... 592 72
Interfacing the SP-3 Tape Reader to the "Élektronika-60" Microcomputer — V. A. Sasunkevich and I. A. Kochkov..... 595 75
Interfacing an F595 Transcriber to an F5007 Counter — O. I. Pilipyuk and I. T. Trofimenko..... 596 76

Interfacing the "Kvarts-1" Terminal to the CAMAC Bus — V. N. Pikhun and A. G. Ustinov..... 598 77
Using the VT-340 (VDT-52100) Terminal as a Controller for the "Élektronika 100-25" Computer — N. M. Koshechko..... 601 80
Interfacing the "Élektronika-60" Microcomputer to the VTA-2000 Terminal and "Élektronika DZ-28" Microcomputer — Ya. S. Zaishlyi, V. R. Kravtsov, and Yu. B. Shebivovk..... 603 82
Interfacing an Élektronika K1-10 Microcomputer to a DARO-1156 Alphanumeric Printer — S. V. Gudymenko, A. L. Gurtovtsev, M. E. Gurchik, and V. G. Kholyavenko..... 606 85

ELECTRONICS AND RADIO ENGINEERING
Multiple-Sampling Analog-to-Digital Converter for the Waveform Analysis of Solitary Signals — V. M. Tarasov and V. K. Tomchakov..... 610 88
Unit for Detecting Gamma and X Rays Using Mercury Diiodide Operating at Room Temperature — K. G. Bulatetskii, V. M. Zaletin, and V. I. Fomin..... 613 90
Transmission of Digital Data over Long Twisted-Pair Lines — V. V. Meer, V. I. Nesterov, and V. A. Yakovlev..... 616 93
Arkad'ev-Marks Voltage-Pulse Generator with Rectifier Elements — M. I. Koslov, V. A. Dzhunov, V. L. Gershenkroi, V. I. Goshurenko, and N. I. Gordienko..... 619 96
High-Current Low-Inductance High-Voltage Pulse Generators — B. V. Kogan, Yu. P. Pichugin, I. N. Romanenko, V. M. Tyukov, and P. P. Shirokov..... 621 97
Thyristor High-Voltage Nanosecond Pulse Shapers — S. I. Zienko..... 624 100
Thyratron Commutator for Tesla Transformer with Increased Pulse-Repetition Rate — Yu. G. Bamburov, I. V. Kazarezov, and E. N. Kokin..... 628 104
Compact High-Voltage Pulse Supply — V. V. Larin and M. M. Shtein..... 630 105
Charging Control for Energy-Storage Capacitors — M. A. Muravitskii, A. M. Gulyuk, and A. E. Lozovenko..... 632 107
Simulation of the Transient Response in a Pulse Voltage Generator — A. G. Ponomarenko and A. S. Surkov..... 634 109

Volume 27, Number 3, Part 2 May-June, 1984

Generator of High-Voltage Nanosecond Pulses for Firing High-Voltage Discharge Gaps — I. Ts. Ivanov and A. I. Trifonov..... 641 113
Current Pulse Generation with Power MOS Transistors — S. I. Zienko, M. N. Gruden', and V. Yu. Smerdov..... 642 114
Stable Square-Wave Generator — L. V. Teslenko..... 644 115
Wide-Band Square-Pulse Generator — Ya. P. Brandis..... 646 117
Device for Monitoring Pulse Amplitude — Yu. N. Zakharov, I. I. Kovbanyuk, and A. I. Yarukhin..... 648 119
Method for Measuring Pulse Voltages — P. M. Tyuryukanov and G. V. Khodachenko..... 651 121
Controllable Electronic Delay Line — B. A. Chulkov and E. B. Fedoseev..... 653 123
Reversing Pulse Distributor — V. N. Gordeev, B. N. Shpilevoi, A. N. Yuzhakov, and A. K. Yakushev..... 656 125
Amplifier for Current Pulses to Supply Semiconductor Lasers — V. K. Eremin..... 659 128
Precision Wideband High-Frequency Logarithmic Amplifier — A. A. Sharin and A. A. Vesnukhov..... 660 129
Normalizing Amplifier — A. V. Alekseev and V. K. Khokhlov..... 662 130
Low-Noise Preamplifier for Low Impedance Signal Sources — A. S. Petrov and E. A. Potylitsyn..... 665 133
Wideband High-Speed Phase Difference-Voltage Converter — V. I. Mordvova, N. N. Shtarev, and V. F. Sivertsev..... 668 135
Amplitude-Difference Meter for Asymmetric Harmonic Voltage — V. N. Silant'ev and L. I. Izmailov..... 670 137
Measuring Small Frequency Drifts of Resonators — G. N. Korostelev and V. A. Romantsev..... 673 139

Analog Commutator — S. D. Dunaev and V. M. Shifrin..... 675 141
Controllable Contactless AC-Voltage Switches — Yu. A. Chernykh..... 677 143
Optoelectronic Switch — B. G. Kozlov, G. A. Epifanov, and Yu. S. Tatarchuk..... 680 145
Digital Strobscopic Integrator for Noise Elimination and Recording of Periodic Signals — M. V. Borisov and V. L. Tsymbalenko..... 681 146
Isochronous Experiments on Nuclear Magnetic Resonance in Liquids — Z. Sh. Idiyatullin, F. M. Samigullin, V. P. Arkhipov, and N. K. Gaisin..... 685 150
Rectangular Resonator for Studying Electron-Nuclear Double Resonance — A. L. Kon'kin, V. P. Meiklyar, and M. L. Falin..... 688 152
Pulsed Magnetic-Field Source for Submillimeter Gyrotrons — S. Ya. Verkhovskii, E. A. Kopelovich, Yu. D. Larichev, A. G. Luchinin, O. V. Malygin, B. Z. Movshevich, V. S. Savin, and F. A. Flat..... 690 154
Control Unit for the ShD-4 Stepping Motor — O. S. Maksumov and R. É. Mamedov..... 693 156
Precision Source of Reference Voltage — A. V. Churbakov..... 695 158
Bipolar DC Supply with Protection Arrangement — B. I. Chemerisov and Yu. P. Davydov..... 698 160
Power Supply for a Photomultiplier — K. P. Kureichik, S. N. Baranov, and N. V. Kozlovskii..... 700 162

GENERAL EXPERIMENTAL TECHNIQUES

Oil-Free Ultrahigh-Vacuum System with a Shortened Pumping Cycle — K. D. Danilov, G. I. Il'in, O. K. Kurbatov, E. M. Orleanskaya, I. V. Tvorogov, L. F. Tereshchenko, and M. V. Shnitko..... 703 164
Fast-Electron Velocity Analyzer — N. N. Veniaminov, A. K. Kuzakov, V. A. Kulikov, and N. G. Rambidi..... 706 167
Auger Spectroscopy of Thin Metal Filaments — A. V. Nakaryakov, A. S. Raspopin, A. M. Shestakov, and S. F. Borisov..... 710 170
Automatic Gain-Stabilization System for a Photomultiplier — V. I. Ugol'nikov and A. M. Shalankevich..... 712 172
Selective Gas-Discharge Source for an Optical-Absorption Gas Analyzer — I. V. Dubashinskaya, L. É. Khvorostovskaya, and S. N. Khvorostovskii..... 715 174
Velocity-Stabilization System for an Electrodynamic Interferometer Drive — B. L. Bukovskii, Yu. M. Kaltygin, and V. A. Raikhert..... 717 176
Baseline Stabilization System for a Two-Frequency Interferometer — P. A. Bagryanskii and V. S. Belkin..... 719 178
Spectroellipsometer with Incidence-Angle Scanning — P. I. Drozd, S. I. Zabelin, L. V. Poperenko, and I. A. Shaikevich..... 722 181
Analog Device for Measuring the Intensity of Weak Light Signals — B. P. Klim, E. P. Pochapskii, and R. F. Fedoriv..... 724 183
Low-Voltage System for Selecting an Isolated Light Pulse from a Train of Picosecond Pulses — A. A. Demidov, G. M. Esayan, and Ya. L. Kalaidzidis..... 727 186
Ruby Laser with Multiple Wavefront Reversal for High-Temperature Plasma Production — V. A. Boiko, G. A. Koldashov, A. Ya. Faenov, A. I. Fedosimov, and I. N. Tsigler..... 730 188
Laser Using Aluminum-Yttrium Garnet with Neodymium Pumped by Radiation from a High-Frequency Electrodeless Discharge — S. N. Golikova, P. S. Gusev, V. P. Gus'kov, V. A. Zhukov, S. M. Pechenegov, V. D. Sazhaev, A. B. Sinitsyn, N. V. Teterev, and B. F. Trinchuk..... 733 190
Visualization of Submillimeter Laser Radiation with a Pyroelectric Television Camera — A. A. Lash and D. N. Yundev..... 736 193
High-Speed Photographic Method of Studying the Dynamics of Domain Boundaries — M. V. Chetkin, S. N. Gadetskii, A. P. Kuz'menko, and V. N. Filatov..... 740 196

Magnetodynamic Meter for Small Mechanical Vibrations — V. A. Krysanov and V. N. Rudenko..... 743 199
Vacuum Ultraviolet Modification of Porous Polymer Membranes with Open Pores — A. V. Mitrofanov..... 748 203
Microwave Resonator for Contactless Measurement of the Resistivity Distribution of Semiconductor Plates with High Spatial Resolution — G. N. Danilov, Yu. V. Lisyuk, and Yu. V. Medvedev..... 752 206
Apparatus for Multielement Fluorescent X-Ray Analysis on Small Samples — A. K. Cheburkin, K. S. Proskura, and A. V. Andreev..... 755 208
Energy-Spectrum Analyzer for Autoelectrons — R. Z. Bakhtizin and Yu. M. Yumaguzin..... 759 212

LABORATORY TECHNIQUES
High-Voltage Glycerin-Film Insulation — N. F. Kovsharov and V. F. Fedushchak..... 764 217
Admission of Volatile Organic Impurities from Water into a Mass Spectrometer — A. A. Rivlin, V. G. Karachevtsev, N. N. Ledneva, K. K. Man'kovskii, and Kh. I. Pruger..... 766 218
Instrument for Multichannel Recording of Mass Spectra — G. M. Gur'yanov, N. N. Korobkov, and O. P. Ninburg..... 768 219
Phase-Inverting Hot-Wire Anemometer Sensitive to the Direction of Flow — A. A. Bormusov, R. N. Gabitov, and G. A. Glebov..... 770 221
Low-Temperature Enhanced-Precision Thermal Converter with Heat Transfer — S. P. Logvinenko and O. A. Rossoshanskii..... 773 223
Low-Temperature Attachment to X-Ray Diffractometer — A. P. Perov..... 776 226
Attachment for Spatial Orientation of Crystals in the Resonator of an Electron Spin Resonance Spectrometer — E. P. Zheglov..... 778 228

Volume 27, Number 4, Part 1 July-August, 1984

Superconducting Bolometers (Review) — I. A. Khrebtov..... 781 5

NUCLEAR EXPERIMENTAL TECHNIQUES
Continuous-Action Electron Accelerator Based on Secondary Ion-Electron Emission — M. A. Abroyan, N. A. Uspenskii, and V. P. Fedyakov..... 805 24
Application of Compression Sections and Nonlinear Shaping Circuits in the Modulator of a Linear Induction Accelerator — G. V. Dolbilov, A. K. Krasnykh, and V. N. Razuvakin..... 808 26
High-Frequency System in the Joint Institute of Nuclear Research Synchrophasotron for Accelerating Light Nuclei — O. I. Brovko, A. I. Mikhailov, and K. V. Chekhlov..... 814 32
Dependence of the Transverse Particle Motion upon the Longitudinal Motion and Filtering of the Phase Volume of the Beam in Linear Proton Accelerators — V. S. Kabanov, S. A. Lukshin, and A. P. Fedotov..... 820 37
Pulsed System for Reducing the Repetition Frequency of Particle Bunches in a Cyclotron Beam — I. I. Zalyubovskii, A. V. Kuznichenko, V. N. Lebedev, A. I. Levon, and G. M. Onishchenko... 823 40
Hollow-Cathode Negative-Hydrogen Ion Source Operated in the Stationary Mode — S. P. Antipov, L. I. Elizarov, M. I. Martynov, and V. M. Chesnokov..... 826 42
Design and Heating Characteristics of a Thermal Emission Cathode for Microtrons — É. A. Luk'yanenko, Yu. E. Tokarev, V. N. Kovalev, A. A. Lyapin, and M. M. Chursin..... 829 44
Gas-Supply System for a Liquid-Tritium Target with a Sensitive Volume of 35 cm^3 — V. M. Bystritskii, Ya. Voznyak, A. Gula, V. P. Dzhelepov, V. K. Kapyshev, M. P. Malek, S. Sh. Mukhamet-Galeeva, L. A. Rivkis, V. A. Stolupin, V. A. Utkin, and Sh. G. Shamsutdinov..... 831 46

Magnetic-Lens β-Spectrometer with a Silicon Detector and a Sawtooth-Like Changing Current — V. S. Zazulin, V. I. Kuznetsov, B. M. Makuni, T. V. Chugai, and L. Ya. Shavtvalov..... 835 50
Spectrometer with High Angular Resolution and Double Monochromatization of a Neutron Beam — Yu. G. Abov, F. G. Kulidzhanov, N. O. Elyutin, and S. N. Nizovoi..... 838 52
Front Neutral-Hadron Calorimeter Counters for European Hybrid Spectrometer — M. Boratav, V. M. Buyanov, E. V. Vlasov, A. P. Vorob'ev, J. David, M. Dykes, Yu. M. Ivanyushenkov, É. P. Kistenev, P. Lutz, N. G. Minaev, D. I. Patalakha, B. Powell, B. F. Polyakov, J. A. Rubio, E. A. Starchenko, and A. G. Kholodenko. 844 57
The 700-liter Xenon Bubble Chamber "Diana" — V. V. Barmin, V. N. Borisov, V. M. Golubchikov, A. I. Gorokhov, V. I. Demekhin, V. S. Demidov, A. G. Dolgolenko, G. A. Kolpashchikov, N. S. Konoplev, M. M. Kutepov, A. G. Meshkovskii, A. A. Nikitin, A. P. Solov'ev, M. S. Khropov, I. V. Chuvilo, and B. A. Shebanov..... 850 63
System for Processing Bubble-Chamber Photographs with an HPD Automatic Unit — A. A. Borovikov, S. A. Gumenyuk, S. G. Nikitin, and V. V. Sikolenko..... 854 66
Increasing the Sensitivity of Photographic Film for Track Photography in Streamer Chambers — A. A. Artamonov, E. M. Gushchin, V. V. Zhukov, A. N. Lebedev, and S. V. Somov..... 858 70
Multiwire Emission Detector — V. G. Gavalyan, M. P. Lorikyan, A. N. Arvanov, and S. M. Gukasyan..... 861 72
Comparative Dosimetric Characteristics of Some Types of Lithium Fluoride Thermoluminescence Detectors — G. Ya. Kaskanov and M. M. Komochkov..... 864 74
Laser System for the Holographic Recording of Information from Track Detectors — E. Bartke, I. Ts. Ivanov, and Ya. Éksnerova..... 866 76

EXPERIMENTAL APPLICATIONS OF COMPUTER TECHNOLOGY
Controller for Interfacing the Elektronika DZ-28 Microcomputer to the MT1016 Numeric Printer — A. A. Abyzov and V. V. Pakhomov..... 869 78
Test System for Checking Electronic Instrumentation of Multichannel Drift Chambers — V. V. Karpukhin..... 871 80

ELECTRONICS AND RADIO ENGINEERING
Method of Measuring Spatial Distribution of an Electric Field in a High-Intensity Electromagnetic Wave — E. F. Bol'shakov and S. I. Gritsinin..... 876 84
General-Purpose Code Converter — M. O. Gingis..... 878 85
Widerange Current–Code Converter for a Scanning X-Ray Tomograph — E. A. Andreev, V. K. Basenko, K. G. Kosharskii, S. A. Pshinichnyi, M. I. Skopyuk, S. P. Sit'ko, and V. A. Shevchenko..... 881 88
Multichannel Synchronous Coincidence Circuit — A. P. Klimakov, A. Yu. Medvedev, and A. V. Mednikov..... 884 91
High-Speed Programmable Multifunction Synchronizer — D. I. Abramovich, V. V. Butskii, A. A. Zaluzhnyi, and N. V. Naumov..... 887 93
Adaptive High-Speed Threshold-Voltage Shaper — S. P. Neustroev, M. V. Soldatenko, A. P. Avdeev, and V. V. Bereka..... 890 96
Threshold Device Whose Actuation Level Follows Pulse Amplitude — A. N. Egorychev and L. S. Priver..... 892 98
Shaping High-Voltage Nanosecond Voltage Drops with Serial Semiconductor Diodes with a Drift Voltage-Recovery Mechanism — S. I. Zienko..... 894 100
Crystal Oscillator Using Series K500 Integrated Circuits — V. V. Butskii, E. E. Konoplin, and N. V. Naumov..... 897 102
Two-Polarity High-Voltage Pulse Generator — M. I. Kozlov, V. A. Dzhunov, V. L. Gershenkroi, V. I. Goshurenko, and N. I. Gordienko..... 898 103
Programmable Walsh-Function Generator — Yu. V. Petelin..... 901 105

Resonance-Switching Overvoltages in a Magnetothyristor Generator — S. P. Dashuk..... 903 107
High-Power Nonlinear Amplifier for Shaping Magnetizing Current Pulses — O. S. Kolotov and N. N. Kudel'kin..... 907 110
High-Current High-Voltage Resistor — V. I. Manylov and V. N. Shendrik..... 910 112
Low-Noise Amplifier for Small DC Voltages — G. A. Khononzon Ya. I. Magun, and N. A. Aniskina..... 912 114

Volume 27, Number 4, Part 2 July-August, 1984

ELECTRONICS AND RADIO ENGINEERING
Autodyne Photoresistor Detector — Yu. S. Mikheev and F. P. Raksina. . . . 915 116
Attachment to RÉ-1306 Spectrometer for Studying Axial Compression — V. N. Vasyukov 917 117
Apparatus for Correlation Analysis of Field Emission at Infrasonic Frequencies — R. Z. Bakhtizin, S. S. Gots, and A. I. Tlyauberdin . . 918 119
Wideband Dielectric Spectrometer — A. A. Belov and V. A. Khvostikov . . . 923 123

GENERAL EXPERIMENTAL TECHNIQUES
Apparatus for Simultaneous Mass and Energy Analysis of Desorption Products Excited by a Pulsed Laser — É. F. Lazneva and A. M. Turiev 926 125
Plasma-Emitter Pulse Electron Source Based on a Cascade Arc — Yu. E. Kreindel', E. M. Oks, and P. M. Shchanin. 928 127
Measuring the Trajectory Parameters of Charged Particles of High-Current Relativistic Electron Beams in a Magnetic Field - A. R. Borisov, A. G. Zherlitsyn, and A. A. Sinebryukhov 932 130
Production of Mo, Ta, and W Ions in an Arc Source — M. Yu. Bredikhin and B. P. Il'enko. 935 133
Surface Charge Compensation in an Ion-Etched Insulator - B. Z. Kanter and A. V. Kozhukhov. 937 135
Investigation of the Time Characteristics of FÉU-130 Photomultipliers in Photon Counting — Yu. N. Zyuzin and V. V. Kurbasov. 940 137
Aftereffect in FÉU-106 Photomultipliers Used for Time Measurements — F. A. Ermalitskii and V. M. Lutkovskii 942 138
Use of FÉU-49B Photomultipliers for Quantitative Large-Range Analysis of Fluxes of Short Light Flashes - V. G. Alalykin, S. B. Gavshin, I. A. Danil'chenko, A. A. Petrukhin, G. A. Potapov, and I. I. Yashin 944 140
Optimizing the One-Electron Sensitivity of an Image Dissector — S. S. Vetokhin, I. R. Gulakov, Yu. V. Pislyak, and I. V. Reznikov 946 142
Extending the Analytical Facilities of Standard Magnetic Mass Spectrometers - A. V. Gubin and G. A. Samsonov 950 145
Upgrading the Ion Source in the MS-1301 Mass Spectrometer — A. G. Boganov, I. I. Cheremisin, and V. L. Stolyarova. 952 147
Flux-Stabilized Spectral Source of Wavelengths from 0.25 to 0.5 μm — V. B. Anzin and V. I. Tarasov 955 149
Source of High-Intensity Monochromatic Radiation for the 200-800-nm Region — V. A. Vasil'ev, V. N. Kuznetsov, and A. A. Lisachenko. . . 957 151
Sweep-Generator of Optical Signals for Rapid Measurement of the Frequency Characteristic of Photodetectors — O. V. Bogdankevich, S. A. Darznek, P. A. Todua, and E. F. Shestakova. 960 153
Spectral Properties of Varifocal Membrane Mirror — V. V. Motoshkin and S. M. Slobodyan 964 156
Collimators for the Vacuum Ultraviolet and Ultrasoft X-Ray Regions — A. V. Mitrofanov 966 159
Fiber-Optics Ring Interferometer with an Automated Data-Acquisition and Processing System — V. V. Ivanov, G. A. Ivanov, A. G. Novikov, Yu. E. Sverchkov, and G. I. Telegin 971 163
Optical-Fiber Modulator — A. V. Kukhta, E. I. Sverchkov, and G. I. Telegin 974 165
Device for Monitoring the Reference Signal in a Lidar — K. D. Shelevoi. 977 168

Fluorescent Quantum Counter for Wavelengths up to 700 nm Based on the Dye **Oxazine-1** — V. A. Petukhov and L. P. Savvina 979 170
Photodetector with Stabilized Anode Stability — G. D. Petrukhin and O. V. Fanasov 981 172
General-Purpose System for **Recording** Weak Pulsed or Continuous Light Signals — A. B. Berezin, A. D. Popov and D. I. Kataev 983 174
Small Low-Noise **He—Ne** Laser with High-Frequency Pumping — V. M. Geller, G. I. Grif, and V. A. Khrustalev. 986 176
System for Synchronizing Two LTI-5 Lasers — V. I. Belousov, S. V. Chernyakov, and V. I. Derzhiev. 990 180
Device for the Pulse-Amplitude Modulation of Laser Beam Power — B. A. Zverev, S. V. Pakhomov, **and P. I. Savostin**. 993 183
High-Voltage Current Stabilizer for a Precision CO_2 Laser — V. I. Gorokhov and O. S. Shan'gin 996 185
Apparatus for Recording Watt—Current Characteristics for a Pulsed Injection Laser — Ya. A. Aarik. 998 186
Measuring Energy of Picosecond Laser Pulses — É. Adomaitis, Z. Dobrovol'skis, and A. Krotkus. 1000 188
Harmonic Spectrum Analyzer of Magnetic Induction — A. F. Baidak, A. A. Mikhailichenko, and V. P. Smirnov 1002 190
Operation of a Pressure Sensor in Elastic and Plastic Media — V. V. Avilov and R. G. Arkhipov 1006 193
NMR Manometer for Measurement of High Pressures at Helium Temperatures — V. D. Doroshev, N. M. Kovtun, A. N. Molchanov, P. I. Polyakov, and V. G. Synkov 1008 195
Controlled-Temperature **Cryostat for Magnetooptical Measurements** — I. I. Zasavitskii, A. A. Izvoryan, B. N. Matsonashvili, V. F. Troitskii, and V. T. Trofimov 1013 199
Meter for the Distribution of Surface Potential — N. T. Yunda. 1016 201
Measurement of **Electric Potential Distribution in Dielectric Films** — V. I. Veretel'nik, B. A. **Kononov, N. K. Ryzhakova,** and N. I. Yagushkin 1019 204
Apparatus for Investigation of **Clusters** of Electrically Active Impurities in Semiconductors by the Method of Small-Angle Light Scattering — S. E. Zabolotskii, V. P. Kalinushkin, M. G. Ploppa, and T. M. Murina. 1021 206

LABORATORY TECHNIQUES

Increased-Stability Shapers of Single **Time Intervals** — V. P. Bakalinskii, V. D. Bichukov, and A. G. Khlon' 1025 209
Wideband Phase Shifter — S. G. Galyba and A. I. Dobretsov. 1027 211
Economical Precision Voltage Regulator — G. A. Kapustin and M. V. Perepukhov. 1030 213
Measurements of the Spectral and Polarizational Characteristics of the Luminescence in Fluorimeters Operated in the Photon-Counting Mode — L. V. Levshin, A. V. Naumov, A. M. Saletskii, and V. I. **Yuzhakov** 1033 216
Destruction of the Latent Photographic Image by Laser Radiation — V. V. Kushin, B. K. Lyapidevskii, and N. B. Khokhlov. 1035 218
Photoelectric Interferometer of White Light for Measuring the Thickness of Transparent Films — V. P. Babenko, S. I. Barabanov, V. A. Gorbarenko, N. N. Evtikhiev, and G. R. Levinson. 1036 219
Device for Biaxial Bending of **Specimens in X-Ray Optical Research** — V. A. Vogman and V. I. Kushnir. 1041 222
Specimen Holder for Measuring the Hall Coefficient and Electrical Conductivity of Semiconductors — L. M. Metelitsa, E. P. Sabo, and G. G. Tsveiba 1043 225

Volume 27, Number 5, Part 1 September-October, 1984

Development Prospects of Scintillator-Photodiode Systems (Review) — V. D. Ryzhkov, P. E. Stadnik, and Yu. A. Yakovlev..... 1045 6

NUCLEAR EXPERIMENTAL TECHNIQUES
A Small-Size Pulse Modulator — V. S. Panasyuk, Yu. K. Samoshenkov, and M. F. Simanovskii..... 1057 17
High-Current Electron Accelerator — B. V. Alekseev, I. M. Gorelikov, V. I. Kazurov, L. V. Mashkov, A. G. Oreshko, G. I. Soklakov, A. I. Fedorenko, and K. B. Yurkevich..... 1060 19
Multichannel Ring Commutator for High-Current Accelerators — I. F. Isakov, E. I. Logachev, and G. E. Remnev..... 1062 21
Plasma Source of Ions — A. P. Semenov..... 1066 23
Crystal-Diffraction Spectrometer of Increased Efficiency — A. I. Saukov, G. A. Gornitsyn, and N. A. Morozov..... 1068 25
Method of Improving the Amplitude Resolution of the Spectra of Gamma-Transition Cascades in the Computer Processing of Encoded Coincidence Data — A. M. Sukhovoi and V. A. Khitrov..... 1071 27
Possible Use of a Wide Source in Spectrographs with a Homogeneous Magnetic Field — A. A. Abdumalikov, A. A. Abdurazakov, A. Kh. Inoyatov, Yu. N. Novikov, A. M. Nurmukhamedov G. A. Kononenko, and V. M. Tsupko-Sitnikov..... 1074 30
A System Recording the Information Obtained from a Multidetector Neutron Diffractometer — V. V. Chernobrovkin, M. B. Dorofeeva, S. G. Teploukhov, S. A. Kiryukhin, L. A. Vysotskaya, and S. F. Dubinin..... 1079 34
Separation of Stopping Events of Charged Particles in a Gas Target with the Aid of Semiconductor Detectors — G. F. Bin'ko, M. G. Gornov, Yu. P. Dobretsov, V. G. Kirillov-Ugryumov, A. A. Maloletnev, A. L. Mikaélyan, A. P. Pichugin, V. P. Protasov, V. I. Salev'ev, A. Ya. Smakov, A. A. Khomutov, and A. V. Shishkov..... 1081 36
Method of Determining Correlations from a Two-Dimensional Scattering Pattern — V. V. Samedov..... 1087 40
Difference Technique for the Determination of Positron Lifetimes — N. P. Valuev and A. N. Zhikharev..... 1090 43
Multiwire Dielectric Detector — M. P. Lorikyan, K. Zh. Margaryan, Yu. E. Narinyan, and V. G. Tarlamazyan..... 1093 45
Investigation of the Characteristics of Multiwire Proportional Chambers with Information Pickup from the Cathode — L. S. Barabsh, A. M. Baranov, G. B. Bondarenko, B. A. Dolgoshein, V. P. Konovalov, A. M. Konstantinov, V. K. Semenov, and A. A. Stifutkin..... 1095 47
Apparatus for Recording Track Information from Photographs Obtained with a Holographic Bubble Chamber — P. F. Ermolov, V. V. Kozlov, V. E. Ogluzdin, and A. V. Shkurenkov..... 1099 49
Cryostats for μSR Experiments — V. G. Grebinnik, V. A. Zhukov, A. B. Lazarev, A. P. Manych, B. A. Nikol'skii, V. I. Selivanov, G. I. Selivanov, and V. A. Suetin..... 1101 51

EXPERIMENTAL APPLICATIONS OF COMPUTER TECHNOLOGY
Personal Computers and Measurement-Computation Complexes for Automation of Large-Scale Laboratory Experiments — V. V. Ivanov, A. D. Morenkov, and A. Ya. Oleinikov..... 1106 56
System for Collection and Transmission of Risk Data to ES-1040 Computer — A. Kishvaradi, Yu. P. Merekov, Z. Mikhaii, and N. N. Khovanskii..... 1110 60
Graphical-Data Processing System — N. V. Egorov and A. G. Karpov..... 1114 63
Unified CAMAC Microprocessor Module for Preliminary Data Processing — V. L. Zaushitsyn, O. V. Kulik, and V. M. Repin..... 1116 65
CAMAC-Compatible Variable Analog Filter — N. V. Belikov..... 1120 69
Multichannel Analog-Digital Converter with Buffer Memory — V. L. Bruk, V. K. Vorob'ev, and V. G. Tishin..... 1123 71
Controller for Screen Display of Dynamics of Measured Process — Yu. V. Chugunov and A. Ya. Ksenzenko..... 1126 74

Interface for K484/2 Digital Measuring System with MPU 16-3 Compact Printer — V. B. Tyapkin..... 1128 76

ELECTRONICS AND RADIO ENGINEERING

High-Speed Recirculating Converters of Single Time Intervals — G. N. Abramov..... 1132 80

Pulse-Height-to-Code Converter for Heavily Loaded Photomultipliers — B. V. Arkhangel'skii, G. N. Evgrafov, Yu. M. Pishchal'nikov, and R. S. Shuvalov..... 1136 84

Differential Pulse Discriminator-Counter — K. D. Shelevoi and A. A. Venikov..... 1139 87

Electronic System for Recording Widely Spaced Pulses from a Proportional Counter with Pulse-Shape Analysis — I. R. Barabanov, V. N. Cavrin, Yu. I. Zakharov, and A. A. Tikhonov..... 1142 89

Shortening of Particle-Detector Pulses by Zero Pole Compensation — R. N. Krasnokutskii, Yu. M. Pishchal'nikov, and R. S. Shuvalov..... 1146 94

High-Frequency High-Voltage Pulse Generator — N. K. Kapishnikov, V. M. Muratov, and V. S. Potapov..... 1151 98

High-Voltage Square-Pulse Generator — A. A. Altukhov, E. A. Gusev, and I. V. Egorov..... 1154 100

High-Voltage Nanosecond-Pulse Generator with Electromechanical Commutator — V. E. Kalyuzhnyi, A. S. Surkov, and V. K. Shilov..... 1155 101

High-Power Drift Peakers with Nanosecond Recovery Time — I. V. Grekhov, V. M. Efanov, A. F. Kardo-Sysoev, and S. V. Shenderei..... 1157 103

Heavy-Current Nanosecond Pulse Shapers Using High-Power MOS Transistors with a Vertical Channel — V. V. Bachurin, V. P. D'yakonov, V. Yu. Smerdov, and O. A. Frolkov..... 1159 105

Nanosecond Pulse Shapers with Power Summing of Thyristor Switches — S. I. Zienko..... 1162 107

Gas-Discharge Nanosecond-Pulse Shaper — E. I. Asinovskii, V. V. Markovets, I. S. Samoilov, and A. M. Ul'yanov..... 1168 113

Compact Proton Accelerator — V. S. Panasyuk, Yu. K. Samoshenkov, M. F. Simanovskii, and V. V. Filimonov..... 1171 115

Measurement of Currents of Strong Electron Beams of Nanosecond Duration — N. G. Pavlovskaya and S. L. El'yash..... 1174 118

Volume 27, Number 5, Part 2 September-October, 1984

High-Voltage Broadband Voltage Divider - V. M. Murugov, G. P. Okutin, V. I. Pankratov, and Yu. A. Polyanitsa. 1177 120

Logarithmic Radio Pulse Amplifier - V. F. Taborov and V. F. Tarasov. . . . 1178 121

Broadband Amplifier Having a Short Recovery Time after an Overload - K. N. Stroev, N. N. Stroev, and V. V. Strautzelis 1180 122

Digital Regulator for Automatic Radio Equipment - V. T. Tsarenko, A. R. Korsunov, and Sh. Kh. Baladishev 1182 124

Programmable Frequency Divider - R. M. Rzhavina and B. A. Semanov. 1185 127

Instrumentation Capacitance-Voltage Converter - A. I. Cheredov and A. V. Klement'ev 1186 128

Microwave Waveguide Slot Radiator - P. Yu. Chumerin. 1188 130

System for Stabilizing Resonance Conditions in Portable NMR Instruments - P. M. Soprunyuk and Ya. S. Michuda. 1189 131

Analyzer for Pulse NMR Spectrometers - B. E. Rytsar. 1191 133

Relaxation Measurements of Weak Nuclear-Quadrupole-Resonance Signals Using an ISSh-1-12 Spectrometer with a "Sigma" Digital Storage Device - V. N. Chernyavskii and G. I. Konstantinov 1194 136

Regulated Power Supplies for Slow-Electron Diffraction Analyzer - N. I. Plyusnin, S. A. Lobachev, and N. G. Galkin. 1196 138

Optoelectronic Field-Direction Switch for Electromagnet - M. A. Chernikov and K. M. Golant. 1199 140

Regulated Current Supply for Superconducting Solenoids - I. M. Grodnenskii, Kh. R. Ozmanyan, and A. V. Shemet. 1201 142

GENERAL EXPERIMENTAL TECHNIQUES

Stroboscopic Method for Study of Transient Plasma Processes — V. V. Tikhomirov and V. V. Shkurkin 1203 144

Lanthanum Hexaboride Cathodes for Electron-Beam Devices — N. V. Parol', B. I. Lazanov, A. A. Golovchenko, N. A. Iofis, B. P. Kovalev, and V. F. Zholobova 1205 146

Ion Source for Layer Analysis of Thin Films — B. Z. Kanter and A. V. Kozhukov 1208 149

Characteristics of the FÉU-112 Photomultiplier with Oxygen-Silver-Cesium Photocathode in the Photon Count Mode — E. A. Lebedev and V. I. Markov. 1211 151

Attachment to Mass Spectrometer for Studying Gas-Phase Deposition of Semiconductor Compounds — V. I. Belousov, G. I. Zhuravlev, N. I. Popenko, A. F. Novozhilov, I. V. Matveev, and V. V. Murav'ev. . 1213 153

Magnetooptical Television Apparatus for Studying Domain Structure of Magnetic Materials — G. G. Shakaryan and G. A. Vermishyan. . . . 1215 155

Magnetooptical Apparatus with Rotary Polaroid — V. N. Grishanov 1217 157

Fast Large-Area Germanium Photodiode — E. M. Verbitskaya, V. K. Eremin, N. B. Strokan, and D. V. Tarkhin 1219 158

Method of Analyzing the Modal Compositon of the Field of a Circular Optical Waveguide — L. A. Bondarev, I. F. Budagyan, G. S. Golovchenko, V. F. Dubrovin, D. I. Mirovitskii, and A. F. Smyk. 1221 160

Synchronization System for High-Power Pulsed Laser with Optoelectronic Control — V. V. Apollonov, S. I. Zienko, V. V. Brytkov, S. V. Murav'ev, and V. A. Yamshchikov 1224 163

Using Avalanche Phototransistors to Synchronize Optoelectronic Cameras — M. I. Demchuk, S. M. Dmitriev, V. P. Mikhailov, and K. V. Yumashev. 1228 166

Dynamic Q Control and Single-Pulse Generation in a Solid-State Laser — I. P. Angelov, G. V. Venkin, D. V. Kazantsev, G. M. Mikheev, and M. Yu. Sklyarov 1230 168

Device for Time Referencing of Pulses from Semiconductor Laser Detector — A. I. Naidenko, P. V. Mindra, G. G. Andrievskii, and A. A. Kuznetsov 1232 170

Transmitted-Power Meter for Production CO_2 Laser — Yu. L. Sitenkov and Yu. M. Khokhlov 1234 172

An Apparatus with Transparent Anvil Windows for Optical and X-Ray Studies at High Pressures — B. A. Fursenko, Yu. A. Litvin, V. D. Kropachev, and O. V. Kholdeev 1236 174

A Diamond Chamber for Examining the Effects of Shear Deformation on the Structure and Properties of Solids at Pressure up to 43 GPa — V. D. Blank, Yu. S. Konyaev, A. I. Kuznetsov, and É. I. Éstrin. . 1240 178

Fraks Camera for Monochromatic Small-Angle Diffractometry with Synchrotron γ Rays — V. N. Korneev, V. S. Gerasimov, A. M. Shamarov, and A. A. Vazina 1243 180

A Device to Measure the Parameters of Planar Seignette-Electric Microcapacitors in the Uhf Range — M. I. Gubler, V. N. Keis, and V. A. Yanchurov 1247 184

Apparatus for Measuring Low-Frequency Noise of Low-Resistance Semiconductor Samples in Pulsed Operation — S. A. Alekperov, V. F. Aleksandrov, Ch. O. Kadzhar, and É. Yu. Salaev. 1251 187

Method of Plane Temperature Waves in the Autooscillation Regime — V. F. Zavorotnyi and Yu. M. Poplavko. 1253 189

Low-Temperature Calorimeter with a Heat-Flux Sensor — V. I. Kosov, V. M. Malyshev, G. A. Mil'ner, and V. F. Shibakin 1255 191

Apparatus for the Study of Dissipative Processes in Type-II Superconductors Using Torsional Vibrations — Dzh. G. Chigvinadze, A. G. Dzhagarov, V. S. Nadareishvili, and T. A. Dzhapiashvili . . . 1257 192

Carbon-Resistor Sensor for a Discrete Helium-Level Indicator — V. I. Lavrent'ev and V. V. Churakov 1261 196

LABORATORY TECHNIQUES

Device for Measuring the Frequency Characteristics of Photoelectric Transducers for the Infrared Range — V. N. Petrovskii, A. N. Rurukin, and R. A. Shananin 1263 198

Autoemission Cathodes Made of Carbon Fiber for an Electron Microscope — N. I. Osipov 1265 199
Device for Adjusting a Resonator and Retuning the Frequency of a Laser — L. S. Vasilenko, A. S. Dychkov, N. M. Dyuba, and M. N. Skvortsov. 1267 201
A Device for Depositing Doped Films in a Quasiclosed Volume — B. T. Boiko, S. V. Manin'ko, P. A. Panchekha, and V. A. Polotskii 1268 202
A Device for Unilateral Thinning of Metal Foils — N. V. Volkov, B. A. Kalin, D. M. Skorov, and I. I. Chernov 1270 204
A Photometer for Monitoring Film Thickness by the Two-Wavelength Method — Sh. A. Furman and Z. É. Él'gart 1272 205
Device for Automatic Formation of an Ohmic Contact to a Semiconductor Structure with a p-n Junction — V. B. Barkov and L. V. Lebedeva. . 1275 209
Preparation of Ohmic Contacts to p-Type CdTe Specimens — I. A. Plysyuk 1277 211
Device for Measurement of the Saturated Vapor Pressure of Materials — M. M. Gubin and G. S. Shteiner 1279 212
Broadband Piezoelectric Pressure Sensor — V. A. Godonyuk, B. V. Zhuravlev, and I. P. Shed'ko 1281 214
An Oven for Testing Materials in Air at Temperatures Up to 1850°C — V. E. Sotnikov, A. M. Smirnitskii, A. V. Satenovskii, V. L. Bakevich, and Yu. M. Mosin 1285 217
An Electron-Beam Apparatus for Soldering the Components of Semiconductor Devices — A. N. Komov, A. I. Kolpakov, N. I. Bondareva, and V. V. Zakharenko. 1286 218
Precision Microcomputer-Controlled Resistance Oven Temperature Regulator — A. I. Fradkov 1289 221
An Automatic Reading Device for an Ice Calorimeter — O. E. Zakurenko and V. M. Kuz'michev 1292 224
Automatic Control of the Operating Conditions of Nuclear Quadrupole Temperature Transducers — A. M. Lenovenko, M. I. Osyka, and V. V. Repitskii 1294 225
Cell for Measurement of Thermal Conductivity of Cryogenic Crystals — Yu. G. Kravchenko, I. N. Krupskii, A. P. Nazarenko, and G. P. Chausov 1296 227
Cryogenic Leads with Braided Heat Exchangers — V. D. Bartenev, V. I. Datskov, and Yu. A. Shishov. 1298 228
Stabilizer of Angle of Shaft Rotation of DC Commutator Motor — S. N. Nizovoi, F. G. Kulidzhanov, and N. O. Elyutin. 1300 230

Volume 27, Number 6, Part 1 November-December, 1984

FASTBUS System. Present State, Problems, and Future Prospects (Review) — V. G. Rybakov..... 1303 5

NUCLEAR EXPERIMENTAL TECHNIQUES

Inductive-Pulsed Power Supply for a Betatron Magnet — Yu. A. Otrubyannikov and A. S. Safronov..... 1319 22
Equivalent-Circuit Study of the Process of Forming a Pulse of Accelerating Voltage in a Linear Induction Accelerator — M. I. Demskii..... 1322 24
Fiber Optic Communication Line in the Ion Current Control System of the I-100 Linear Accelerator — Yu. L. Bessonov, A. I. Vagin, V. M. Vatutin, G. G. Gurov, N. E. Detinenko, A. F. Dunaitsev, A. A. Ivanov, O. P. Lebedev, G. T. Pak, S. I. Pilipenko, V. M. Firsov, and M. D. Khodakovskii..... 1326 27
Optical Diagnosis of Electron Beam in the "Pakhra" Synchrotron — Yu. A. Bashmakov, V. A. Karpov, and A. S. Yarov..... 1329 30
Forming of X-Ray Beams by a Slitless Collimator — V. N. Leikin, T. A. Mingazin, and V. I. Zelenov..... 1333 33
System of Measurement of Proton Polarization in a Polarized Target — I. M. Karnaukhov, A. A. Lukhanin, Yu. N. Telegin, V. I. Trotsenko, and V. F. Chechetenko..... 1338 37

Automated Universal Experimental Complex for the Study of Neutron-Nucleus Interaction — A. A. Sarkisov, A. M. Boguslavskii, A. G. Guseinov, V. N. Ivanov, and I. N. Martem'yanov..... 1342 40
Method of Processing Positron Lifetime Spectra — N. P. Valuev, A. N. Zhikharev, and A. B. Klimov..... 1344 42
Dosage of Particles for a Bubble Chamber in the Microsecond Range of Beam Extraction Times — N. S. Bryukhanov, B. A. Vakhromeev, K. I. Gubrienko, V. E. Zelenin, V. I. Kotov, and B. V. Prosin..... 1346 44
Angular Resolution of Wide-Gap Spark Chambers with a Coding Collimator for γ-Rays of an Energy above 50 MeV — S. A. Voronov, V. M. Zemskov, A. A. Moiseev, Yu. V. Ozerov, V. A. Rud'ko, and Yu. T. Yurkin..... 1352 49
Condensed-Krypton Scintillators of Diameter 0.5 m — S. N. Anisimov, A. I. Bolozdynya, V. N. Stekhanov, V. P. Miroshnichenko, and B. U. Rodionov..... 1355 51
Time and Frequency Characteristics of Scintillation and Semiconductor X-Ray Detectors — M. V. Zelepukhin, S. V. Krupin, E. A. Meleshko, A. G. Morozov, A. I. Chechin, A. V. Voronin, and A. D. Sokolov..... 1360 56
Stabilization of Scintillation Detector by Reference Signal from Radioactive Source — O. I. Nedavnii..... 1363 58

EXPERIMENTAL APPLICATIONS OF COMPUTER TECHNOLOGY
Reduction to Ideal Instrument by Linear Programming — V. K. Lyapidevskii... 1366 62
Autonomous Controller Emplcying 155IP3 Arithmetic-Logic Unit — A. B. Laptev, V. V. Marchenkov, Yu. V. Tubol'tsev, I. V. Tubol'tseva, and E. Yu. Fokin..... 1369 65
Communications Interface for the Elektronika DZ-28 Microcomputer and Experimental Equipment — Yu. D. Afonin, V. N. Shalaginov, and A. R. Beketov..... 1374 70
SM-3 (SM-4) Computer Interface for Pulse Signal Processing — I. A. Levko and V. E. Yamnyi..... 1378 73

ELECTRONICS AND RADIO ENGINEERING
Digital Stabilization of Multichannel Gamma Spectrometer — V. V. Remeikis..... 1382 77
Apparatus for Recording Signals from Neutrino-Calorimeter Drift Chambers — Yu. B. Bushnin, A. N. Isaev, A. K. Koloplyannikov, N. K. Marchikhin, and V. A. Sen'ko..... 1385 80
Modernized Plotter Interface for AI-4096 Analyzer — V. N. Sinitsyn, Yu. N. Ginzburg, and P. L. Lysenko..... 1393 87
Multichannel Counter Based on Pulse Analyzer — Yu. A Babenko, I. M. Kozlov, O. P. Nikotin, and A. A. Sluchaev..... 1394 88
High-Speed Parallel Counter — B. N. Gus'kov, V. A. Kalinnikov, V. R. Krastev, A. N. Maksimov, and N. M. Nikityuk..... 1397 91
Recording of Widely Spaced Random Pulses with an S8-12 Storage Oscilloscope — Yu. I. Zakharov..... 1400 94
Dynamic Storage Device — D. L. Gromenko..... 1402 97
Clamping Circuit — P. V. Denisyuk, V. V. Eliseeva, G. V. Il'inskii, and O. L. Kuznetsov..... 1404 98
Television Analyzer for Oscillograms of Short Single Pulses — E. N. Men'shov, V. A. Nikolaenko, and G. S. Tetnev..... 1405 99
Square Root Extracting Analog–Digital Converter — S. U. Klimovich..... 1407 101

Volume 27, Number 6, Part 2 November-December, 1984

Analog Meter for the Instantaneous Value of a Low Frequency — A. G. Radchenko. 1411 104
Autonomous Correlation-Coefficient Meter — A. L. Kurakin 1414 106
A 16-MV Voltage Pulse Generator — M. I. Grabchenko, V. V. Konotop, G. F. Neskorodov, I. R. Pekar', and S. M. Fertik. 1418 110
Powerful Square-Wave Pulse Generator with Subnanosecond Rise and Fall Times — V. N. Legkii, D. D. Karimbaev, G. L. Prikhod'ko, and D. A. Soskin. 1421 113
High-Voltage Pulse Generator with a Triggering Frequency of up to 100 Pulses per Second — N. K. Kapishnikov 1423 114

Method for Increasing the Stability of Bridge Pulse Generators — V. P. Bakalinskii, V. D. Bichukov, and A. G. Khlon' 1425 116
Low-Noise Amplifiers for the 50-1000 MHz Range — A. M. Korolev 1427 117
Digital–Analog Matching Filter with Numerical Control — A. P. Kovalenko, S. B. Makarov, and B. M. Medvedev. 1429 119
Precision Stabilizer for the Integral Values of Pulse Currents in Inductive Loads — V. D. Skirda, V. A. Sevryugin, and V. I. Sundukov. 1432 122
Gas Dispersometer for the Millimeter Range — A. A. Potapov and E. P. Metsner 1435 125
Power-Supply System for High-Voltage Electron Guns with Grid Control — Yu. V. Grigor'ev. 1437 127
High-Stability Bipolar Power Supply — L. N. Voitsekhovich and I. P. Kovashevich 1440 129
Digitally Controlled Current Source — S. I. Kutsarov and A. M. Mitev 1443 131
Small Stabilized-Voltage Source with Transformerless Input — V. V. Popivnenko, B. V. Grinbert, N. P. Kraevskaya, G. G. Tyukhai, and G. E. Chipinskaya. 1445 133
Stabilized Power Supply for a DNK-90 Ultraviolet Lamp — S. V. Pribega, V. V. Stepanyuk, and Yu. A. Kolomiets. 1447 135

GENERAL EXPERIMENTAL TECHNIQUES

Gas-Discharge Electron Gun with a Gasdynamic Window — É. V. Chikin, L. N. Orlikov, and I. V. Minina. 1449 137
Pulsed Electron-Beam Source Based on MIRA-4D X-Ray Equipment — G. G. Golubkov, S. I. Zavorotnyi, and A. A. Ovchinnikov 1452 139
Shaping a Stationary Tubular Electron Beam of High Perveance in a Longitudinal Magnetic Field — I. N. Meshkov, A. N. Sharapa, and A. V. Shemyakin 1454 141
Electrical Strength of a High-Voltage High-Current Vacuum Lead — S. V. Rybalov 1458 144
Submillimeter Quasioptical Homodyne Interferometer for Examining a Plasma with a Low Electron Density — A. V. Golubev, A. K. Vakar, and É. A. Tischenko 1461 147
Pulsed Differential Pumping System — G. N. Antipov, F. A. Bagautdinov, and S. V. Rybalov. 1465 150
Comparison of Grounded-Anode and Grounded-Photocathode Operation of FEU-130 — I. R. Gulakov 1467 152
Multichannel Recorder for Two Optical Spectra — G. V. Venkin, D. A. Esikov, D. I. Maleev, and G. M. Mikheev 1468 153
Stabilization of Optical Interference Schemes for Measuring Small Acoustic Signals — V. P. Trotsenko. 1473 158
Neodymium Laser with an Adjustable Pulse Length in Single-Frequency Single-Shot Emission — E. P. Mesnyankin, B. M. Sedov, and Yu. V. Tomashevich. 1477 161
Wide-Band Laser Intensity Stabilization System — K. V. Kiryunikov and A. V. Shishaev. 1480 164
Polarizing Interference Filter for an LZhI-402 Dye Laser — A. V. Voronin, B. V. Kuznetsov, and V. M. Kuznetsov 1482 165
Superconducting Quantum Magnetometer for the Range 1-200°K — I. N. Khlyustikov 1484 167
Multilayer Cylindrical Magnetic Screens — Yu. V. Taran 1487 170
Apparatus for Acoustical Investigations in the Process of Plastic Deformation at Temperatures of 4.2-300°K — V. V. Zoninashvili, U. Messerschmidt, V. A. Melik-Shakhnazarov, I. A. Naskidashvili, and N. M. Yastrebova. 1493 175
Apparatus for Investigating the Separation of a Gas Mixture into Two Phases by the Ultrasonic Method — B. É. Kanishchev, L. L. Pitaevskaya, and A. P. Kurshin. 1497 178

LABORATORY TECHNIQUES
High-Voltage Optoisolator of Increased Accuracy — V. S. Belkin and S. A. Vibe 1500 181
Numeric-Printer Interface for AI-4096 Analyzer — F. A. Dederer and V. G. Mironchik 1503 183
Attachment to Measuring Microscope for Preparing Planar Structures of Micron Size — V. V. Petrov 1505 185
Device for Removing Thin Layers from Crystals — R. N. Fesh, N. I. Zbykovskaya, A. V. Dzyadek, and O. É. Panchuk 1507 187
Devices for an Electron Magnetic Spectrometer — V. G. Bragin, I. N. Shabanova, and V. A. Trapeznikov. 1509 188
Specimen-Exchange Device for an ÉS2401 Electron Spectrometer — N. I. Zaretskii and E. A. Tyavlovskaya. 1511 190
Viewing Device for Electron-Beam Equipment — R. Sh. Nasyrov. 1513 191
Pyroelectric Detector Based on Strontium–Barium Niobate — B. G. Salamov, A. G. Arushanov, and N. N. Lebedeva. 1514 192
Apparatus for Measuring Thermal-Expansion Coefficients — V. E. Rode, A. I. Lyalin, S. A. Finkel'berg, and V. G. Kavalerov 1516 193
Thermostat Based on a KR142EN Microcircuit — S. A. Bogatchuk, A. V. Pedorenko, and A. I. Yavnyi. 1520 197
Heat-Resisting Vacuum Sealing Material — E. A. Kolenko 1521 198
Refractory Filters with Calibrated Holes — A. D. Styrkas 1522 199
